Your Majesty!

I begin this letter by offering my sincere congratulations on the seventieth anniversary of your reign. I have great appreciation for Your Majesty's service to the nation. Until now, no one has celebrated the Platinum Jubilee. A lot has happened over these seventy years. NATO and the EU were created, people landed on the moon, there was an assassination attempt on the WTC and communism was overthrown. Undoubtedly, these events had a significant impact on Your Majesty's decisions towards your country.

Let me introduce myself. My name is Szymon and I'm fourteen years old. I'm in the seventh grade. My school is big and modern. We have spacious classrooms that are equipped with computers and other equipment needed for learning. There are a lot of extra – curricular activities which are conducted in an interesting way by our teachers. I live in Łęczna, a small town in eastern Poland. There is a lot of greenery around my house. I have a huge garden and four dogs and two cats live with me. I really wanted to raise ducks so my mother and grandmother helped me create a tiny farm. I enjoy spending my free time surrounded by my pets. I know that Your Majesty is a fan of Corgi dogs. My dogs are mixed breed.

I also like spending my free time with my grandmother in the kitchen. I know that Your Majesty's menu includes coronation chicken or Queen Elizabeth's chicken which, I imagine, must be delicious. My grandmother and I use similar ingredients; we also add curry but instead of apricots we add pineapple. I like experimenting in the kitchen so I wish I could take part in the competition that was announced by Buckingham Palace for the anniversary dessert – platinum pudding. I would love to try my hand at this competition.

I realize that Your Majesty is a very busy person so I end this letter. Once again, I express my admiration for Your Majesty's great devotion to the British people and I wish Your Majesty continued success and loads of health.

Yours sincerely,

Szymon Zięba, class 7e
